BCyber named as a Finalist in the 2022 Australian Women In Security Awards

Sydney, Australia – 30, September 2022 - BCyber Pty Ltd (“BCyber”) a privately owned Australian based innovative cyber risk mitigation company, has been announced as a 2022 Finalist in the Australian Women in Security Awards in the category of **“Best Innovative Business Reshaping the Future of the Security Industry”**.

This award aims to seek out the Australian business making the most important, and far-reaching contribution to the future of cybersecurity.

BCyber works in Financial Services with Small and Medium Enterprise (“SMEs”) to identify and address cybersecurity business risk through data gathering and Ai NLP knowledge agents. BCyber takes cybersecurity risk mitigation out of the “technology silo” and places it firmly where it belongs - in a business's overall risk program. BCyber has made cybersecurity risk mitigation easy to understand, accessible and affordable to a market that needs it the most.

Traditionally, SMEs are left behind when it comes to cybersecurity. Not knowing where to start, considered too small by typical consultants &/or unable to afford the measures &/or staff available to big business. Yet they have “crown jewels” that can and do interest the cybercriminals. For the first time SMEs can establish and run an integrated comprehensive cybersecurity risk management program for a reasonable cost. Protecting Intellectual Property, clients' Sensitive/ Personally Identifiable Information, strengthening cyber resilience, improving business continuity capabilities, meeting newly imposed regulations and become cyber insurance ready.

GRACE - BCyber’s **G**overnance, **R**isk management, **A**ssurance, **C**ompliance and **E**ducation program housed on our proprietary portal. Each component is a critical element in building a firm’s risk mitigation ecosystem. We understand that many prefer to take a “building block” approach and that is why each component of the program is tailored to meet their needs. Through GRACE, BCyber identifies vulnerabilities and gaps and follows through with interactive and collaborative solutions.

GRACE makes the complexity of cybersecurity risk management simple and accessible to the SME

Ms Karen Stephens, Co-Founder and CEO said *“We are very excited and honored to be named as a Finalist in the 2022 Australian Women In Security Awards. It is a testament to the teams’ hard work and the ongoing support of our business partners. Our mission of democratising cyber resilience and risk mitigation programs, making them more attainable for the SME market is now one step closer.”*

-ENDS-

This announcement was approved for release by Karen Stephens, Co-founder and CEO of BCyber PtyLtd

About BCyber

BCyber Pty Ltd (“BCyber”) is an Australian based cyber risk prevention company that works with groups to review and harden their cyber risk programs and grow their businesses.

BCyber uses their own proprietary services and distribute a select number of innovative third-party solutions to strengthen cybersecurity postures. Supported by GRACE, BCyber’s dynamic Governance, Risk management, Assurance, Compliance and Education portal – BCyber empowers businesses to take an effective, proactive, and agile approach towards cybersecurity. BCyber brings GRACE to your cybersecurity posture.
