BCyber has been shortlisted for the Australian AI Awards 2024.

BCyber has been named as a finalist in the Australian AI Awards for AI Innovator - Cyber Security.

The inaugural Australian AI Awards recognises the professionals, organisations, and solutions that have transformed the Australian economy across industries including banking, law, accounting, and wealth management through to defence, aerospace, cyber, and more.

The finalist list, which was announced on Thursday, 19 September 2024, features over 190 high-achieving professionals and businesses across 25 submission-based categories.

Securing a place as a finalist is widely recognised as a remarkable achievement in the artificial intelligence industry. It signifies the unwavering determination and commitment of individuals, teams and businesses playing a pivotal role in propelling the industry forward.

Winners will be announced at a black-tie gala at the Four Seasons Sydney on Wednesday, 6 November 2024.

Cyber Daily editor Liam Garman extended his congratulations to all finalists.

"AI is revolutionising the way Australian businesses are delivering for their customers and achieving critical productivity gains," Garman said.

"This event is about recognising champions across the industry who drive innovation from financial services to defence and law, and recognising how they have transformed the way that we work.

"I applaud all of our finalists and look forward to celebrating their amazing accomplishments at the Australian AI Awards in November."

Graham Chee, Co-Founder & Managing Director at BCyber pty Ltd, said that he was humbled to be recognised and proud to be named as a finalist in the Australian AI Awards 2024.

"BCyber's recognition for our excellent contribution to the AI industry reinforces the strength of our service and dedication to connecting with the community and engaging with clients," he said.
