FOR IMMEDIATE RELEASE

BCyber Named Top Cybersecurity Pick for Australian Businesses by SafetyDetectives

SYDNEY, NSW – August 6, 2025 – BCyber, a leading Australian cybersecurity provider, proudly announces its recognition as a "Top Pick" by SafetyDetectives, a globally respected authority in cybersecurity research and reviews. This distinction highlights BCyber's commitment to delivering practical, scalable, and Australian-first cybersecurity solutions to businesses across the nation.

[Roberto Popolizio](#), affiliate manager for SafetyDetectives has praised BCyber for its unique, user-friendly platform, GRACE (Governance, Resilience, Assurance, Compliance, and Education), which transforms traditional cybersecurity management from manual, spreadsheet-based processes to automated, intelligent governance frameworks. In relation to this recognition, he said "We reject all vendor pitches. Our picks come from reader feedback and research. BCyber meets our readers' top three pain points: localized support, jargon-free communication, and proprietary tools that prove they listen and know what they're doing."

"We are thrilled to be acknowledged by SafetyDetectives as a top Australian cybersecurity provider," said Karen Stephens, Co-Founder & CEO of BCyber. "This recognition validates our mission to make cybersecurity understandable, actionable, and aligned with business objectives for all Australian businesses, not just the tech elite."

[SafetyDetectives](#) specifically highlighted several key differentiators that set BCyber apart:

- **Australian-first approach:** All services are tailored to local regulations and business needs.
- **Employee-first focus:** Significant investment in cyber awareness training, recognizing the critical role of people in resilience.
- **Full-service approach:** Covering every aspect of cybersecurity management from discovery to implementation.
- **Built for business-people:** The GRACE platform is intuitive and practical, designed for business leaders rather than IT professionals.

BCyber's comprehensive offerings cover the entire cyber risk lifecycle, including Cybersecurity Assessments, Incident Response Planning, Website Monitoring & Hardening, Employee Cyber Awareness Training, Ongoing Risk Mitigation & Maintenance, Cyber Policy Suite development, and Cyber Due Diligence.

About BCyber:

Headquartered in Sydney, BCyber delivers practical, scalable cybersecurity risk mitigation services designed specifically for Australian businesses. Through its proprietary GRACE platform, BCyber provides a centralized hub for managing cyber risks, enabling businesses to conduct assessments, develop policies, train employees, comply with Australian standards, and prepare for incidents. Founded by Karen Stephens and Graham Chee, BCyber is dedicated to empowering businesses to stay secure while focusing on growth.

About SafetyDetectives:

SafetyDetectives is a global publishing group of cybersecurity experts, privacy researchers, and technical product reviewers dedicated to providing accurate and valuable information to help readers make informed decisions about staying safe, secure, and protected on the internet.
